Shaping the Future of Environmental Engineering Education

GreenDT is modernizing Environmental Engineering education in Uzbekistan with support from European Union partners. The project focuses on developing a cutting-edge Master's program, fostering university-industry collaboration, and aligning with the European Green Deal to promote sustainable change.

Modern Master's Program

*Developing innovative,
sustainability-driven education with
practical skills for the green economy*

Environmental Engineering Labs

*Establishing high-tech labs at 5
universities for hands-on research,
innovation, and training*

Digital Education Tools

*Providing accessible learning through
e-learning platforms and online
resources*

International Collaboration

*Building strong partnerships with EU
universities for knowledge exchange and
global best practices*

This project has received funding from the European Union under grant agreement No GA 101179013. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union.
